

SILSDEN TOWN COUNCIL BIODIVERSITY POLICY

Silsden Town Council formally adopted this policy on 4th June 2026 in response to the strengthened 'biodiversity duty' placed on local authorities introduced by the Environment Act 2021. Silsden Town Council will take biodiversity into account in all its decisions and actions.

1. Background

All local authorities including parish and town councils must complete their first consideration of what action to take for biodiversity by 1 January 2024. Policies and objectives must be agreed as soon as possible after this. Councils can and should reconsider their actions on a quarterly, annual or regular basis and must reconsider the actions they can take within five years of when they completed their previous reconsideration.

According to the Act, public authorities need to check if a number of strategies affect how they comply with their biodiversity duty including:

- Local nature recovery strategies
- Species conservation strategies
- Protected site strategies

They need to understand how or if they are relevant to their organisation, be aware of how these strategies affect land that is owned and managed by them, or actions they could take to conserve or enhance biodiversity and consider how they can contribute to the strategy where appropriate.

Biodiversity is the collective term for the variety and abundance of forms of life found in an area, including animals, plants, fungi and microorganisms like bacteria. Each of these species and organisms work together in ecosystems to maintain, balance and support life.

Biodiversity supports everything in nature that we need to survive including, food, oxygen, clean air and clean water.

2. Silsden Town Council will:

- i. Consider the impact on biodiversity in the decisions it makes in council, committee and working group meetings. It will seek to minimise adverse impacts on biodiversity as a result of the council's activities and will identify opportunities to increase biodiversity when practicable.
- ii. Encourage practices and projects beneficial to biodiversity.
- iii. Communicate information and raise awareness of biodiversity through its website and newsletters.
- iv. Work in partnership with other organisations to protect, promote and enhance biodiversity within areas of the parish.
- v. Wherever possible, raise public awareness of biodiversity issues as part of its leadership role within the local community.
- vi. When commenting on planning applications, will support site and building design that benefits biodiversity through the conservation and integration of existing habitats or provision of new habitats. It will support protection of sensitive habitats from development and will consider whether the development would mean the loss of important habitats for wildlife in respect of all applications.

vii. Review its internal policies and processes to enhance biodiversity.

3. As a landowner, Silsden Town Council will consider how land it manages could improve biodiversity. It will:

i. Remove invasive species as required under appropriate legislation in order to prevent harm to native species.

ii. Avoid the use of herbicides except in exceptional circumstances.

iii. Time grounds maintenance work or vegetation removal such that the impact on biodiversity is minimised. Maintenance practices that are beneficial to biodiversity will be taken into consideration if contracts are placed.

iv. Encourage dedicated spaces to attract and enhance wildlife
